## Tech commentaries:

The **AEW UK REIT Plc** stock price gained **0.80%** on the last trading day (Friday, 3rd May 2024), rising from **£87.00** to **£87.70**. It has now gained 4 days in a row. It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the stock fluctuated **2.13%** from a day low at **£87.14** to a day high of **£89.00**. The price has risen in 7 of the last 10 days and is up by **6.56%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **97 thousand** more shares were traded than the day before. In total, **371 thousand** shares were bought and sold for approximately **£32.55 million**.

The stock has broken the wide and falling short-term trend up. Firstly a slower falling rate is indicated, but this may very well be an early signal of a trend shift. On the reaction, there will be support on the roof of the current trend broken, which is **£86.57**, a level that may pose a second chance to hit a runner. According to fan-theory **£95.86** will be the next possible trend-top level and thereby pose a resistance level that may not be broken at the first attempt.

Mostly positive signals in the chart today. The **AEW UK REIT Plc** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the stock has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **£85.11** and **£85.57**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Thursday, April 18, 2024**, and so far it has risen 6.95%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal.

On the downside, the stock finds support just below today's level from accumulated volume at **£83.30** and **£83.00**. On the upside the stock meets some resistance just above today's level from accumulated volume at **£89.50**, **£90.00** and **£94.00**.

In general the stock tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the stock moved **£1.86** between high and low, or **2.13%**. For the last week the stock has had daily average volatility of **4.49%**.

Several short-term signals are positive and the break-up from the falling trend indicates a possible shift for a trend. We believe that the prices around the breaking point will indicate particularly good levels, but we also believe that the current level will hold a possible good buy level for the short-term period.

Risk: **Low**

Evaluation: **Buy Candidate**
