It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the stock fluctuated **5.14%** from a day low at **TRY 355.00** to a day high of **TRY 373.25**. The price has risen in 6 of the last 10 days and is up by **10.78%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **230 thousand** more shares were traded than the day before. In total, **828 thousand** shares were bought and sold for approximately **TRY 304.13** million.

The stock has broken the wide and strong rising the short-term trend up and an even stronger rate of rising is indicated. For any reaction back there will now be support on the roof on the current trend broken at **TRY 355.69**, a level that may pose a second chance to hit a runner. According to fan-theory **TRY 396.81** will be the next possible trend-top level and thereby pose a resistance level that may not be broken at the first attempt.

The **AG Anadolu Grubu Holding A.S.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **TRY 347.36** and **TRY 307.76**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Monday, March 18, 2024**, and so far it has risen 48.19%. Further rise is indicated until a new top pivot has been found. Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

On the downside, the stock finds support just below today's level from accumulated volume at **TRY 337.25** and **TRY 304.00**. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

AG Anadolu Grubu Holding A.S. holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.
