## Tech commentaries:

The **Agios Pharmaceuticals** stock price gained **1.38%** on the last trading day (Thursday, 18th Apr 2024), rising from **\$29.03** to **\$29.43**. During the last trading day the stock fluctuated **3.00%** from a day low at **\$29.03** to a day high of **\$29.90**. The price has risen in 6 of the last 10 days and is up by **5.41%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **87 thousand** more shares were traded than the day before. In total, **549 thousand** shares were bought and sold for approximately **\$16.16 million**.

The stock lies in the lower part of a very wide and strong rising trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **\$28.63** is broken, it will firstly indicate a slower rate of rising, but may also be an early warning for a trend shift. Given the current short-term trend, the stock is expected to rise **23.61%** during the next 3 months and, with a 90% probability hold a price between **\$35.39** and **\$48.40** at the end of this 3-month period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Agios Pharmaceuticals** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$29.51** and **\$29.87**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Tuesday, February 27, 2024**, and so far it has fallen -15.46%. Further fall is indicated until a new bottom pivot has been found.

On the downside, the stock finds support just below today's level from accumulated volume at **\$26.80** and **\$25.15**. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$29.94**, **\$31.79** and **\$32.99**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **\$0.87** between high and low, or **3.00%**. For the last week, the stock has had daily average volatility of **3.63%**.

The Agios Pharmaceuticals stock holds several negative signals and despite the positive trend, we believe **Agios Pharmaceuticals** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this stock.

Risk: **Medium**

Evaluation: **Sell Candidate**
