The **AGNC Investment Corp. Cum Conv Red Pfd** stock price gained **0.482%** on the last trading day (Friday, 3rd May 2024), rising from **\$24.92** to **\$25.04**. It has now gained 5 days in a row. It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the stock fluctuated **0.765%** from a day low at **\$24.85** to a day high of **\$25.04**. The price has risen in 7 of the last 10 days and is up by **1.87%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **8 thousand** more shares were traded than the day before. In total, **38 thousand** shares were bought and sold for approximately **\$958.38 thousand**.

The stock is at the upper part of a narrow and horizontal trend and normally this may pose a good selling opportunity but a break-up through the top trend line at **\$25.05** will give a strong buy signal and a trend shift could be expected. Given the current horizontal trend, you can expect **AGNC Investment Corp. Cum Conv Red Pfd** stock with a 90% probability to be traded between **\$24.45** and **\$25.07** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

Mostly positive signals in the chart today. The **AGNC Investment Corp. Cum Conv Red Pfd** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$24.77** and **\$24.68**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Friday, April 05, 2024**, and so far it has risen 2.50%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **AGNC Investment Corp. Cum Conv Red Pfd** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. Higher liquidity also reduces the general risk.

AGNC Investment Corp. Cum Conv Red Pfd finds support from accumulated volume at **\$24.73** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

In general the stock tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the stock moved **\$0.190** between high and low, or **0.765%**. For the last week the stock has had daily average volatility of **0.83%**.

Several short-term signals are positive and we conclude that the current level may hold a buying opportunity, as there is a fair chance for **AGNC Investment Corp. Cum Conv Red Pfd** stock to perform well in the short-term period.
