Tech commentaries:

The **AltaGas Ltd.** stock price gained **1.05%** on the last trading day (Friday, 17th May 2024), rising from **\$30.49** to **\$30.81**. During the last trading day the stock fluctuated **1.05%** from a day low at **\$30.52** to a day high of **\$30.84**. The price has risen in 5 of the last 10 days and is up by **1.48%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **782 thousand** more shares were traded than the day before. In total, **782 thousand** shares were bought and sold for approximately **\$24.08** million.

The stock lies in the upper part of a narrow and weak rising trend in the short term, and this may normally pose a very good selling opportunity for the short-term trader as reaction back towards the lower part of the trend can be expected. A break-up at the top trend line at **\$30.89** will firstly indicate a stronger rate of rising. Given the current short-term trend, the stock is expected to rise **5.88%** during the next 3 months and, with a 90% probability hold a price between **\$31.38** and **\$32.70** at the end of this 3-month period.

The **AltaGas Ltd.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$30.59** and **\$29.89**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Tuesday, April 16, 2024**, and so far it has risen 6.24%. Further rise is indicated until a new top pivot has been found. Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

AltaGas Ltd. finds support from accumulated volume at \$29.30 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

In general the stock tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the stock moved **\$0.320** between high and low, or **1.05%**. For the last week the stock has had daily average volatility of **0.95%**.

AltaGas Ltd. holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: **Low**

Evaluation: **Hold/Accumulate**
