Tech commentaries:

The **IntegraGen SA** stock price fell by **-1.72%** on the last day (Tuesday, 25th Jun 2024) from **0.580€** to **0.570€**. It has now fallen 3 days in a row. During the last trading day the stock fluctuated **1.75%** from a day low at **0.570€** to a day high of **0.580€**. The price has fallen in 5 of the last 10 days and is down by **-3.39%** for this period. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. On the last day, the trading volume fell by **-3 thousand** shares and in total, **181** shares were bought and sold for approximately **103.17€**.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-12.23%** during the next 3 months and, with a 90% probability hold a price between **0.457€** and **0.596€** at the end of this 3-month period.

There are mixed signals in the stock today. The **IntegraGen SA** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **0.591€** and **0.641€**. A break-up above any of these levels will issue buy signals. Volume fell along with the price during the last trading day which is technical positive. One should, however, note that this stock may have low liquidity in periods, which increases the general risk. The very low volume increases the risk and reduces the other technical signals issued. A buy signal was issued from a pivot bottom point on **Tuesday, June 18, 2024**, and so far it has fallen 0%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD).

There is no support from accumulated volume below today's level and given the right condition the stock may perform very badly in the next couple of days. On the upside the stock meets some resistance from accumulated volume at **0.600€**, **0.640€** and **0.700€**.

This stock has average movements during the day, but be aware of low or falling volume as this increases the risk. During the last day, the stock moved **0.0100€** between high and low, or **1.75%**. For the last week the stock has had daily average volatility of **6.75%**.

IntegraGen SA holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this stock.

Risk: **Medium**

Evaluation: **Sell Candidate**
