Tech commentaries:

The **Allreal Holding AG** stock price fell by **-0.519%** on the last day (Tuesday, 25th Jun 2024) from **154.00 Fr** to **153.20 Fr**. During the last trading day the stock fluctuated **0.91%** from a day low at **153.20 Fr** to a day high of **154.60 Fr**. The price has been going up and down for this period, and there has been a 2.27% gain for the last 2 weeks. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. On the last day, the trading volume fell by **-6 thousand** shares and in total, **21** thousand shares were bought and sold for approximately **3.27 Fr** million.

The stock lies the upper part of a falling trend in the short term, and this may normally pose a very good selling opportunity for the short-term trader as reaction back towards the lower part of the trend can be expected. A break up at the top trend line at **153.37 Fr** will firstly indicate a slower falling rate, but may be the first sign of a trend shift. Given the current short-term trend, the stock is expected to fall **-2.12%** during the next 3 months and, with a 90% probability hold a price between **142.69 Fr** and **150.12 Fr** at the end of this 3-month period. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

The **Allreal Holding AG** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **152.06 Fr** and **151.92 Fr**. A breakdown below any of these levels will issue sell signals. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Tuesday, June 04, 2024**, and so far it has fallen **-0.649%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

Allreal Holding AG finds support from accumulated volume at 153.00 Fr and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **153.40 Fr**, **154.00 Fr** and **155.00 Fr**.

In general the stock tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the stock moved **1.40 Fr** between high and low, or **0.91%**. For the last week the stock has had daily average volatility of **1.03%**.

Allreal Holding AG holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: **Low**

Evaluation: **Hold/Accumulate**
