## Tech commentaries:

The **Mirae Asset Mutual Fund** trust price gained **0.366%** on the last trading day (Friday, 28th Jun 2024), rising from **?27.29** to **?27.39**. During the last trading day the trust fluctuated **0.84%** from a day low at **?27.36** to a day high of **?27.59**. The price has fallen in 6 of the last 10 days but is still up by **1.26%** over the past 2 weeks. Volume fell on the last day by **-76 thousand** shares and in total, **106 thousand** shares were bought and sold for approximately **?2.91 million**. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The trust lies in the middle of a strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the trust is expected to rise **18.12%** during the next 3 months and, with a 90% probability hold a price between **?30.98** and **?33.83** at the end of this 3-month period.

The **Mirae Asset Mutual Fund** trust holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **?27.38** and **?26.29**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The trust should be watched closely. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Friday, June 14, 2024**, and so far it has fallen **-2.11%**. Further fall is indicated until a new bottom pivot has been found.

On the downside, the trust finds support just below today's level from accumulated volume at **?25.73** and **?25.06**. On the upside the trust meets some resistance just above today's level from accumulated volume at **?27.47**, **?27.70** and **?27.87**.

This trust has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the trust moved **?0.230** between high and low, or **0.84%**. For the last week, the trust has had daily average volatility of **1.37%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **Mirae Asset Mutual Fund** trust to perform well in the short-term.

Risk: **Medium**

Evaluation: **Buy Candidate**
