MACD: Sell

Tech commentaries:

No changes to the price of **Poulaillon SA** stock on the last trading day (Tuesday, 25th Jun 2024). During the last trading day the stock fluctuated **3.00%** from a day low at **4.66€** to a day high of **4.80€**. The price has fallen in 6 of the last 10 days and is down by **-5.28%** for this period.

The stock has broken the wide and horizontal trend down. Breaks like this are often followed by swift and strong movements, and any correction down to the breakline at approximately **4.66€** is considered to be a "second chance" to get out before further fall. It is, however, important to note that false breaks may appear and that the price may move back into the horizontal trend. A break on increasing volume is considered to be more significant and reliable than breaks on low volume.

A buy signal was issued from a pivot bottom point on **Monday, June 24, 2024**, and so far it has fallen 0%. Further rise is indicated until a new top pivot has been found. Volume gained on the last day while the price remained unchanged. This is not a classical divergence, but the stock should be watched more closely as it may be a "turning point". The very low volume increases the risk and reduces the other technical signals issued. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Poulaillon SA** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **4.82€** and **5.07€**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

There is no support from accumulated volume below today's level and given the right condition the stock may perform very badly in the next couple of days. On the upside the stock meets some resistance from accumulated volume at **5.00€**, **5.05€** and **5.15€**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **0.140€** between high and low, or **3.00%**. For the last week, the stock has had daily average volatility of **3.40%**.

Poulaillon SA holds several negative signals and is within a wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock.

Risk: **Medium**

Evaluation: **Sell Candidate**
