Tech commentaries:

The **Alta Equipment Group Inc.** stock price gained **0.270%** on the last trading day (Friday, 28th Jun 2024), rising from **\$25.91** to **\$25.98**. During the last trading day the stock fluctuated **0%** from a day low at **\$25.98** to a day high of **\$25.98**. The price has been going up and down for this period, and there has been a **0.03%** gain for the last 2 weeks. Volume fell on the last day by **-5 thousand** shares and in total, **150** shares were bought and sold for approximately **\$3.90** thousand. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock is moving within a narrow and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **Alta Equipment Group Inc.** stock with a **90%** probability to be traded between **\$25.50** and **\$26.00** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

The **Alta Equipment Group Inc.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the stock has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **\$25.96** and **\$25.98**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Wednesday, June 26, 2024**, and so far it has risen **0.698%**. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day while the price increased. This causes a divergence and may be considered as an early warning, but it may not be. The very low volume increases the risk and reduces the other technical signals issued.

Alta Equipment Group Inc. finds support from accumulated volume at **\$25.93** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$26.00**, **\$26.00** and **\$26.04**.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock During the last day, the stock moved **\$0** between high and low, or **0%**. For the last week the stock has had daily average volatility of **0.97%**

Alta Equipment Group Inc. holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. We have upgraded our analysis conclusion for this stock since the last evaluation from a Sell to a Hold/Accumulate candidate.

Risk: Low
