Tech commentaries:

The **Alto Metals Limited** stock price gained **6.67%** on the last trading day (Tuesday, 25th Jun 2024), rising from **\$0.0300** to **\$0.0320**. During the last trading day the stock fluctuated **0%** from a day low at **\$0.0320** to a day high of **\$0.0320**. The price has fallen in 5 of the last 10 days and is down by **-13.51%** for this period. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **32 thousand** more shares were traded than the day before. In total, **632 thousand** shares were bought and sold for approximately **\$20.21 thousand**.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-13.26%** during the next 3 months and, with a 90% probability hold a price between **\$0.0230** and **\$0.0345** at the end of this 3-month period.

Alto Metals Limited has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. The very low volume increases the risk and reduces the other technical signals issued. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Alto Metals Limited** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$0.0320** and **\$0.0361**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Monday, May 27, 2024**, and so far it has fallen -21.95%. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

Alto Metals Limited finds support from accumulated volume at \$0.0310 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$0.0330**, **\$0.0370** and **\$0.0380**.

This stock may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this stock is considered to be "high risk". During the last day, the stock moved **\$0** between high and low, or **0%**. For the last week, the stock has had daily average volatility of **8.48%**.

Alto Metals Limited holds several negative signals and is within a very wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock.

Risk: **High**

Evaluation: **Sell Candidate**
