Tech commentaries:

No changes to the price of **AMMYI Coin USD** cryptocurrency on the last trading day (Saturday, 18th May 2024). During the last trading day the cryptocurrency fluctuated **0%** from a day low at **\$0.0016** to a day high of **\$0.0016**. The price has been going up and down for this period, and there has been a -18.53% loss for the last 2 weeks.

The cryptocurrency lies in the middle of a very wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the cryptocurrency is expected to rise **13.05%** during the next 3 months and, with a 90% probability hold a price between **\$0.0011** and **\$0.0027** at the end of this 3-month period.

Some negative signals were issued as well, and these may have some influence on the near short-term development. The **AMMYI Coin USD** cryptocurrency holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the longterm average is above the short-term average there is a general sell signal in the cryptocurrency giving a more negative forecast for the stock. On further gains, the cryptocurrency will meet resistance from the long-term Moving Average at \$0.0016. On a fall, the cryptocurrency will find some support from the short-term average at \$0.0016. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. A sell signal was issued from a pivot top point on **Friday**, **March 08, 2024**, and so far it has fallen -28.23%. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

On the downside, the cryptocurrency finds support just below today's level from accumulated volume at \$0.0014 and \$0.0013. On the upside the cryptocurrency meets some resistance from accumulated volume at \$0.0019, \$0.0019 and \$0.0019.

This cryptocurrency may move much during the day (volatility) and with periodic low trading volume this cryptocurrency is considered to be "high risk". During the last day, the cryptocurrency moved **\$0** between high and low, or **0%**. For the last week the cryptocurrency has had daily average volatility of **0.116%**.

AMMYI Coin USD holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this cryptocurrency. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this cryptocurrency since the last evaluation from a Hold/Accumulate to a Sell candidate.

Risk: High

Evaluation: Sell Candidate
