Tech commentaries:

The **American Lithium Corp.** stock price gained **7.89%** on the last trading day (Friday, 17th May 2024), rising from **\$0.697** to **\$0.752**. It has now gained 3 days in a row. It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the stock fluctuated **11.59%** from a day low at **\$0.690** to a day high of **\$0.770**. The price has been going up and down for this period, and there has been a 10.59% gain for the last 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **453 thousand** more shares were traded than the day before. In total, **632 thousand** shares were bought and sold for approximately **\$475.23 thousand**.

Given the current short-term trend, the stock is expected to fall **-15.83%** during the next 3 months and, with a 90% probability hold a price between **\$0.381** and **\$0.633** at the end of this 3-month period. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

The **American Lithium Corp.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$0.679** and **\$0.639**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Monday, April 22, 2024**, and so far it has risen 51.61%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **American Lithium Corp.** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. Higher liquidity also reduces the general risk.

On the downside, the stock finds support just below today's level from accumulated volume at **\$0.700** and **\$0.695**. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$0.787**, **\$0.80** and **\$0.82**.

This stock may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this stock is considered to be "high risk". During the last day, the stock moved **\$0.0800** between high and low, or **11.59%**. For the last week, the stock has had daily average volatility of **8.07%**.

American Lithium Corp. holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Buy to a Hold/Accumulate candidate.

Risk: High

Evaluation: Hold/Accumulate
