Tech commentaries:

The **Mercantil Bank Holding Corp. Class A** stock price gained **1.58%** on the last trading day (Thursday, 9th May 2024), rising from **\$22.77** to **\$23.13**. During the last trading day the stock fluctuated **2.29%** from a day low at **\$22.72** to a day high of **\$23.24**. The price has risen in 6 of the last 10 days and is up by **4.76%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **11 thousand** more shares were traded than the day before. In total, **47 thousand** shares were bought and sold for approximately **\$1.10** million.

The stock lies in the upper part of a wide and weak rising trend in the short term, and this may normally pose a very good selling opportunity for the short-term trader as reaction back towards the lower part of the trend can be expected. A break-up at the top trend line at **\$23.54** will firstly indicate a stronger rate of rising. Given the current short-term trend, the stock is expected to rise **2.26%** during the next 3 months and, with a 90% probability hold a price between **\$21.41** and **\$24.07** at the end of this 3-month period.

Mostly positive signals in the chart today. The **Mercantil Bank Holding Corp. Class A** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$22.65** and **\$22.19**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Wednesday, April 17, 2024**, and so far it has risen 11.20%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **Mercantil Bank Holding Corp. Class A** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. Higher liquidity also reduces the general risk.

Mercantil Bank Holding Corp. Class A finds support from accumulated volume at **\$22.72** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$23.29**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **\$0.520** between high and low, or **2.29%**. For the last week, the stock has had daily average volatility of **2.58%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **Mercantil Bank Holding Corp. Class A** stock to perform well in the short-term.

Risk: **Medium**

Evaluation: **Buy Candidate**
