The stock lies in the lower part of a wide and strong rising trend in the short term, and this may normally pose a very good buying opportunity. Given the current short-term trend, the stock is expected to rise **20.22%** during the next 3 months and, with a 90% probability hold a price between **?710.19** and **?801.08** at the end of this 3-month period.

Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Monday, May 06, 2024**, and so far it has fallen **-5.90%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

**Asahi India Glass Limited** finds support from accumulated volume at **?599.10** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **?623.55**, **?627.95** and **?640.30**.
