Tech commentaries:

No changes to the price of **Asian Paints Limited** stock on the last trading day (Wednesday, 1st May 2024). During the last trading day the stock fluctuated **0%** from a day low at **₹2,875.90** to a day high of **₹2,875.90**. The price has risen in 5 of the last 10 days and is up by **1.62%** over the past 2 weeks.

The stock lies in the middle of a falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-4.02%** during the next 3 months and, with a 90% probability hold a price between **₹2,600.39** and **₹2,806.51** at the end of this 3-month period. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

The **Asian Paints Limited** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **₹2,866.89** and **₹2,856.82**. A breakdown below any of these levels will issue sell signals. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Tuesday, April 30, 2024**, and so far it has fallen **0%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

Asian Paints Limited finds support from accumulated volume at **₹2,868.45** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **₹2,918.30**, **₹2,936.30** and **₹3,017.40**.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock. During the last day, the stock moved **₹0** between high and low, or **0%**. For the last week the stock has had daily average volatility of **1.22%**.

Asian Paints Limited holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this stock.

Risk: **Low**

Evaluation: **Sell Candidate**
