Tech commentaries:

The **Ausom Enterprise Limited** stock price fell by **-2.97%** on the last day (Friday, 3rd May 2024) from **94.02** to **91.23**. During the last trading day the stock fluctuated **6.31%** from a day low at **90.30** to a day high of **96.00**. The price has fallen in 7 of the last 10 days but is still up by **0.34%** over the past 2 weeks. Volume has increased on the last day by **1 thousand** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **3** thousand shares were bought and sold for approximately **275.79** thousand.

The stock is moving within a very wide and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **Ausom Enterprise Limited** stock with a 90% probability to be traded between **72.87** and **101.35** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

The **Ausom Enterprise Limited** stock holds a sell signal from the short-term Moving Average; at the same time, however, there is a buy signal from the long-term average. Since the short-term average is above the long-term average there is a general buy signal in the stock giving a positive forecast for the stock. On further gains, the stock will meet resistance from the short-term Moving Average at approximately **93.66**. On a fall, the stock will find some support from the long-term average at approximately **90.08**. A break-up through the short-term average will send a buy signal, whereas a breakdown through the long-term average will send a sell signal. A buy signal was issued from a pivot bottom point on **Monday, April 22, 2024**, and so far it has risen **3.22%**. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). **Ausom Enterprise Limited** gained volume on the last day, but on falling prices. In technical terms, this is called divergence and may be an early warning. In some cases, increasing volume on falling prices may be considered positive, but that is mainly in typical "sell-offs".

Ausom Enterprise Limited finds support from accumulated volume at **90.92** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **94.26**, **97.25** and **101.38**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **5.70** between high and low, or **6.31%**. For the last week, the stock has had daily average volatility of **6.14%**.

Ausom Enterprise Limited holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Buy to a Hold/Accumulate candidate.
