Tech commentaries:

The Bad Idea AI USD stock price fell by -0.741% on the last day (Friday, 28th Jun 2024) from \$0.00000002 to \$0.00000002. During the last trading day the stock fluctuated 11.77% from a day low at \$0.00000002 to a day high of \$0.00000003. The price has been going up and down for this period, and there has been a 0.14% gain for the last 2 weeks. Volume has increased on the last day by 706 thousand shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, 6 million shares were bought and sold for approximately \$0.134.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall -37.36% during the next 3 months and, with a 90% probability hold a price between \$0.00000001 and \$0.00000002 at the end of this 3-month period. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

There are few to no technical positive signals at the moment. The Bad Idea AI USD stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at \$0.00000002 and \$0.00000002. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on Thursday, June 06, 2024, and so far it has fallen -25.73%. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Bad Idea AI USD gained volume on the last day, but on falling prices. In technical terms, this is called divergence and may be an early warning. In some cases, increasing volume on falling prices may be considered positive, but that is mainly in typical "sell-offs". The very low volume increases the risk and reduces the other technical signals issued.

Bad Idea AI USD finds support from accumulated volume at \$0.00000002 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at \$0.00000002, \$0.00000002 and \$0.00000003.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved \$0.00000000 between high and low, or 11.77%. For the last week, the stock has had daily average volatility of 5.13%.

Bad Idea AI USD holds several negative signals and is within a very wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock.

Risk: Medium

Evaluation: Sell Candidate
