Tech commentaries:

No changes to the price of **BabyAMA USD** cryptocurrency on the last trading day (Saturday, 18th May 2024). During the last trading day the cryptocurrency fluctuated **0%** from a day low at **\$0.00000000** to a day high of **\$0.00000000**. The price has been going up and down for this period, and there has been a -2.33% loss for the last 2 weeks.

The cryptocurrency lies in the middle of a very wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the cryptocurrency is expected to rise **10.69%** during the next 3 months and, with a 90% probability hold a price between **\$0.00000000** and **\$0.00000000** at the end of this 3-month period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **BabyAMA USD** cryptocurrency holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **\$0.00000000** and **\$0.00000000**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Saturday, March 16, 2024**, and so far it has fallen -22.22%. Further fall is indicated until a new bottom pivot has been found. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

On the downside, the cryptocurrency finds support just below today's level from accumulated volume at **\$0.00000000** and **\$0.00000000**. On the upside the cryptocurrency meets some resistance from accumulated volume at **\$0.00000000**, **\$0.00000000** and **\$0.00000000**.

In general the cryptocurrency tends to have controlled movements and therefore the general risk is considered low. However, be aware of low or falling volume and make sure to keep an eye on the cryptocurrency. During the last day, the cryptocurrency moved **\$0** between high and low, or **0%**. For the last week the cryptocurrency has had daily average volatility of **0%**.

The BabyAMA USD cryptocurrency holds several negative signals and despite the positive trend, we believe **BabyAMA USD** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this cryptocurrency. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this cryptocurrency since the last evaluation from a Hold/Accumulate to a Sell candidate.

Risk: **Low**

Evaluation: **Sell Candidate**
