Tech commentaries:

The **Mirae Asset Mutual Fund** trust price fell by **-0.479%** on the last day (Friday, 28th Jun 2024) from **?530.60** to **?528.06**. During the last trading day the trust fluctuated **0.527%** from a day low at **?527.32** to a day high of **?530.10**. The price has risen in 7 of the last 10 days and is up by **5.62%** over the past 2 weeks. Volume fell on the last day along with the trust, which is actually a good sign as volume should follow the trust. On the last day, the trading volume fell by **-178** shares and in total, **23** shares were bought and sold for approximately **?12.15** thousand.

The trust lies in the upper part of a weak rising trend in the short term, and this may normally pose a very good selling opportunity for the short-term trader as reaction back towards the lower part of the trend can be expected. A break-up at the top trend line at **?532.23** will firstly indicate a stronger rate of rising. Given the current short-term trend, the trust is expected to rise **8.55%** during the next 3 months and, with a 90% probability hold a price between **?540.02** and **?577.72** at the end of this 3-month period.

The **Mirae Asset Mutual Fund** trust holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **?525.73** and **?499.12**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Wednesday, June 26, 2024**, and so far it has fallen -0.522%. Further fall is indicated until a new bottom pivot has been found. Volume fell along with the price during the last trading day which is technical positive. One should, however, note that this trust may have low liquidity in periods, which increases the general risk. The very low volume increases the risk and reduces the other technical signals issued.

Mirae Asset Mutual Fund finds support from accumulated volume at **?516.94** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the trust meets some resistance just above today's level from accumulated volume at **?530.60** and **?530.83**.

This trust has average movements during the day, but be aware of low or falling volume as this increases the risk. During the last day, the trust moved **?2.78** between high and low, or **0.527%**. For the last week the trust has had daily average volatility of **0.92%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **Mirae Asset Mutual Fund** trust to perform well in the short-term.

Risk: **Medium**

Evaluation: **Buy Candidate**
