Tech commentaries:

The **Brunswick Corporation 6.500% Se** stock price gained **0.123%** on the last trading day (Monday, 24th Jun 2024), rising from **\$24.99** to **\$25.02**. It has now gained 5 days in a row. It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the stock fluctuated **0.0228%** from a day low at **\$25.02** to a day high of **\$25.03**. The price has risen in 7 of the last 10 days. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **822** more shares were traded than the day before. In total, **2** thousand shares were bought and sold for approximately **\$40.83** thousand.

The stock is at the upper part of a horizontal trend and normally this may pose a good selling opportunity but a break-up through the top trend line at **\$25.28** will give a strong buy signal and a trend shift could be expected. Given the current horizontal trend, you can expect **Brunswick Corporation 6.500% Se** stock with a 90% probability to be traded between **\$24.11** and **\$25.53** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

The **Brunswick Corporation 6.500% Se** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$24.94** and **\$24.72**. A breakdown below any of these levels will issue sell signals. **Brunswick Corporation 6.500% Se** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. The very low volume increases the risk and reduces the other technical signals issued. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Tuesday, June 04, 2024**, and so far it has fallen **-0.83%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

Brunswick Corporation 6.500% Se finds support from accumulated volume at **\$24.88** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$25.09**, **\$25.21** and **\$25.89**.

In general the stock tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the stock moved **\$0.0057** between high and low, or **0.0228%**. For the last week the stock has had daily average volatility of **0.462%**.

Brunswick Corporation 6.500% Se holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: Low
