The stock lies in the middle of a wide and falling trend in the short term and further fall within the trend is signaled. There are mixed signals in the stock today. The **Banque Cantonale du Jura SA** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. A buy signal was issued from a pivot bottom point on **Tuesday, June 04, 2024**, and so far it has risen 1.75%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **Banque Cantonale du Jura SA** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. The very low volume increases the risk and reduces the other technical signals issued.

We have upgraded our analysis conclusion for this stock since the last evaluation from a Sell to a Hold/Accumulate candidate.

Risk: **Low**
