MV Short: Sell
Pivot: Sell
Volume: Sell
MACD: Sell

Tech commentaries:

No changes to the price of **Bytecoin** cryptocurrency on the last trading day (Thursday, 30th May 2024). During the last trading day the cryptocurrency fluctuated **6.90%** from a day low at **\$0.000029** to a day high of **\$0.000031**. The price has risen in 4 of the last 10 days but is still down by **-3.12%** for this period.

The cryptocurrency lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the cryptocurrency is expected to fall **-21.87%** during the next 3 months and, with a 90% probability hold a price between **\$0.00001727** and **\$0.00002761** at the end of this 3-month period. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

There are few to no technical positive signals at the moment. The **Bytecoin** cryptocurrency holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at \$0.00003243 and \$0.00003349. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Saturday**, **April 27**, **2024**, and so far it has fallen -20.51%. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

Bytecoin finds support from accumulated volume at \$0.00003 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the cryptocurrency meets some resistance just above today's level from accumulated volume at **\$0.000032**, **\$0.000033** and **\$0.000034**.

This cryptocurrency has average movements during the day, but be aware of low or falling volume as this increases the risk. During the last day, the cryptocurrency moved **\$0.000002** between high and low, or **6.90%**. For the last week the cryptocurrency has had daily average volatility of **17.63%**.

Bytecoin holds several negative signals and is within a very wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this cryptocurrency. We have upgraded our analysis conclusion for this cryptocurrency since the last evaluation from a Strong Sell to a Sell candidate.

Risk: Medium

Evaluation: Sell Candidate
