Tech commentaries:

No changes to the price of **Blue Hills Bancorp** stock on the last trading day (Monday, 8th Apr 2019). During the last trading day the stock fluctuated **0%** from a day low at **\$23.90** to a day high of **\$23.90**. The price has been going up and down for this period, and there has been a 6.46% gain for the last 2 weeks.

The stock lies in the middle of a wide and weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **4.76%** during the next 3 months and, with a 90% probability hold a price between **\$23.65** and **\$26.68** at the end of this 3-month period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Blue Hills Bancorp** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$23.90** and **\$23.96**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Friday, April 05, 2019**, and so far it has fallen **0%**. Further fall is indicated until a new bottom pivot has been found. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

Blue Hills Bancorp finds support from accumulated volume at \$23.85 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$24.02**, **\$24.75** and **\$24.85**.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock During the last day, the stock moved **\$0** between high and low, or **0%**. For the last week the stock has had daily average volatility of **0%**

The Blue Hills Bancorp stock holds several negative signals and despite the positive trend, we believe **Blue Hills Bancorp** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this stock.

Risk: Low

Evaluation: Sell Candidate
