Tech commentaries:

The **Ea Series Trust - Ea Bridgeway Omni** ETF price fell by **-1.01%** on the last day (Tuesday, 25th Jun 2024) from **\$20.15** to **\$19.95**. During the last trading day the ETF fluctuated **0.83%** from a day low at **\$19.91** to a day high of **\$20.07**. The price has been going up and down for this period, and there has been a **-1.93%** loss for the last 2 weeks. Volume fell on the last day along with the ETF, which is actually a good sign as volume should follow the ETF. On the last day, the trading volume fell by **-121 thousand** shares and in total, **153 thousand** shares were bought and sold for approximately **\$3.06** million.

The ETF is moving within a horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **Ea Series Trust - Ea Bridgeway Omni** ETF with a 90% probability to be traded between **\$19.23** and **\$20.94** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and ETFs seldom manage to go directly from the bottom of a trend up to the top. ETFs turning up in the middle of a horizontal trend are therefore considered to be potential runners.

A buy signal was issued from a pivot bottom point on **Friday, June 14, 2024**, and so far it has risen **0.704%**. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Ea Series Trust - Ea Bridgeway Omni** ETF holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$19.97** and **\$20.61**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

Ea Series Trust - Ea Bridgeway Omni finds support from accumulated volume at **\$19.82** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the ETF meets some resistance just above today's level from accumulated volume at **\$20.34**, **\$20.47** and **\$20.57**.

In general the ETF tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the ETF moved **\$0.165** between high and low, or **0.83%**. For the last week the ETF has had daily average volatility of **0.87%**.

Ea Series Trust - Ea Bridgeway Omni holds several negative signals and is within a falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this ETF.

Risk: **Low**

Evaluation: **Sell Candidate**
