## Tech commentaries:

The **Bit Origin Limited** stock price gained **4.74%** on the last trading day (Tuesday, 25th Jun 2024), rising from **\$4.85** to **\$5.08**. During the last trading day the stock fluctuated **6.85%** from a day low at **\$4.82** to a day high of **\$5.15**. The price has risen in 8 of the last 10 days and is up by **38.8%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **215 thousand** more shares were traded than the day before. In total, **518 thousand** shares were bought and sold for approximately **\$2.63** million.

The stock lies in the upper part of a very wide and strong rising trend in the short term, and this may normally pose a very good selling opportunity for the short-term trader as reaction back towards the lower part of the trend can be expected. A break-up at the top trend line at **\$5.44** will firstly indicate a stronger rate of rising. Given the current short-term trend, the stock is expected to rise **18.77%** during the next 3 months and, with a 90% probability hold a price between **\$3.54** and **\$6.46** at the end of this 3-month period.

The **Bit Origin Limited** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$4.79** and **\$4.02**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Friday, June 21, 2024**, and so far it has fallen -6.10%. Further fall is indicated until a new bottom pivot has been found.

On the downside, the stock finds support just below today's level from accumulated volume at **\$4.38** and **\$4.12**. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$5.26** and **\$5.41**.

This stock may move very much during the day (volatility) and with a very large prediction interval from the Bollinger Band this stock is considered to be "very high risk". During the last day, the stock moved **\$0.330** between high and low, or **6.85%**. For the last week, the stock has had daily average volatility of **13.90%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **Bit Origin Limited** stock to perform well in the short-term.

**Risk: Very High**

**Evaluation: Buy Candidate**
