score: **0.487**
#6945/ 29925

The **Bufab AB (publ)** stock price gained **0.700%** on the last trading day (Friday, 17th May 2024), rising from **kr371.40** to **kr374.00**. It has now gained 3 days in a row. It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the stock fluctuated **1.74%** from a day low at **kr367.60** to a day high of **kr374.00**. The price has risen in 8 of the last 10 days and is up by **10.32%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **4 thousand** more shares were traded than the day before. In total, **25 thousand** shares were bought and sold for approximately **kr9.18** million.

A buy signal was issued from a pivot bottom point on **Monday, April 29, 2024**, and so far it has risen 11.44%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Bufab AB (publ)** stock holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the longterm average is above the short-term average there is a general sell signal in the stock giving a more negative forecast for the stock. On further gains, the stock will meet resistance from the long-term Moving Average at **kr380.81**. On a fall, the stock will find some support from the short-term average at **kr366.14**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **kr6.40** between high and low, or **1.74%**. For the last week, the stock has had daily average volatility of **2.12%**.
