Tech commentaries:

The **Balwin Properties Limited** stock price fell by **-11.26%** on the last day (Friday, 17th May 2024) from **\$222.00** to **\$197.00**. During the last trading day the stock fluctuated **13.71%** from a day low at **\$197.00** to a day high of **\$224.00**. The price has been going up and down for this period, and there has been a 11.3% gain for the last 2 weeks. Volume has increased on the last day by **54 thousand** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **133 thousand** shares were bought and sold for approximately **\$26.20** million.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-10.40%** during the next 3 months and, with a 90% probability hold a price between **\$145.80** and **\$198.53** at the end of this 3-month period.

The **Balwin Properties Limited** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$191.86** and **\$179.89**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Thursday, May 16, 2024**, and so far it has fallen - 11.26%. Further fall is indicated until a new bottom pivot has been found. Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

Balwin Properties Limited finds support from accumulated volume at \$188.00 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$198.00**, **\$200.00** and **\$210.00**.

This stock may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this stock is considered to be "high risk". During the last day, the stock moved **\$27.00** between high and low, or **13.71%**. For the last week, the stock has had daily average volatility of **14.16%**.

Balwin Properties Limited holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: High

Evaluation: Hold/Accumulate
