Tech commentaries:

The **Carabao Group Public Company Limited** fund price gained **0.722%** on the last trading day (Friday, 3rd May 2024), rising from **₹69.25** to **₹69.75**. It has now gained 4 days in a row. It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the fund fluctuated **1.44%** from a day low at **₹69.25** to a day high of **₹70.25**. The price has risen in 6 of the last 10 days and is up by **11.16%** over the past 2 weeks. Volume fell on the last day by **-623 thousand** shares and in total, **4 million** shares were bought and sold for approximately **₹291.61 million**. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

Given the current short-term trend, the fund is expected to fall **-12.02%** during the next 3 months and, with a 90% probability hold a price between **₹51.69** and **₹61.37** at the end of this 3-month period. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

Mostly positive signals in the chart today. The **Carabao Group Public Company Limited** fund holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **₹67.04** and **₹64.28**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Thursday, April 04, 2024**, and so far it has risen 13.41%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The fund should be watched closely.

On the downside, the fund finds support just below today's level from accumulated volume at **₹65.50** and **₹63.50**. On the upside the fund meets some resistance just above today's level from accumulated volume at **₹71.50**, **₹72.50** and **₹73.25**.

This fund has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the fund moved **₹1.00** between high and low, or **1.44%**. For the last week, the fund has had daily average volatility of **2.48%**.

Several short-term signals are positive, despite the fund being in a falling trend, we conclude that the current level may hold a buying opportunity as there is a fair chance for fund to perform well in the short-term.

Risk: **Medium**
