Tech commentaries:

The **Çelik Halat ve Tel Sanayii A.S.** stock price fell by **-0.92%** on the last day (Friday, 17th May 2024) from **TRY 30.42** to **TRY 30.14**. It has now fallen 3 days in a row. During the last trading day the stock fluctuated **1.93%** from a day low at **TRY 30.10** to a day high of **TRY 30.68**. The price has fallen in 8 of the last 10 days and is down by **-9.16%** for this period. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. On the last day, the trading volume fell by **-85 thousand** shares and in total, **501 thousand** shares were bought and sold for approximately **TRY 15.10 million**.

The stock lies in the lower of a very wide and falling trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **TRY 29.56** is broken, it will firstly indicate a stronger fall rate. Given the current short-term trend, the stock is expected to fall **-7.82%** during the next 3 months and, with a 90% probability hold a price between **TRY 27.25** and **TRY 41.37** at the end of this 3-month period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Çelik Halat ve Tel Sanayii A.S.** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **TRY 31.13** and **TRY 36.58**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Tuesday, April 16, 2024**, and so far it has fallen **-34.82%**. Further fall is indicated until a new bottom pivot has been found. Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

There is no support from accumulated volume below today's level and given the right condition the stock may perform very badly in the next couple of days. On the upside the stock meets some resistance just above today's level from accumulated volume at **TRY 30.50**, **TRY 35.34** and **TRY 37.46**.

This stock may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this stock is considered to be "high risk". During the last day, the stock moved **TRY 0.580** between high and low, or **1.93%**. For the last week, the stock has had daily average volatility of **5.97%**.

Çelik Halat ve Tel Sanayii A.S. holds several negative signals and is within a very wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock.

Risk: High

Evaluation: Strong Sell Candidate
