MACD: Sell

## Tech commentaries:

The **Cerillion Plc** stock price fell by **-2.26%** on the last day (Friday, 17th May 2024) from **£1,550.00** to **£1,515.00**. During the last trading day the stock fluctuated **3.89%** from a day low at **£1,511.20** to a day high of **£1,570.00**. The price has fallen in 5 of the last 10 days and is down by **-4.72%** for this period. Volume has increased on the last day by **1 thousand** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **11 thousand** shares were bought and sold for approximately **£16.65 million**.

The stock is moving within a wide and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **Cerillion Plc** stock with a 90% probability to be traded between **£1,486.16** and **£1,642.76** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

There are few to no technical positive signals at the moment. The **Cerillion Plc** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **£1,558.57** and **£1,539.57**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Thursday, May 09, 2024**, and so far it has fallen **-6.48%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

**Cerillion Plc** finds support from accumulated volume at **£1,500.00** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **£1,555.00**, **£1,570.00** and **£1,590.00**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **£58.80** between high and low, or **3.89%**. For the last week, the stock has had daily average volatility of **3.94%**.

**Cerillion Plc** holds several negative signals and is within a wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Hold/Accumulate to a Sell candidate.

Risk: **Medium**

Evaluation: **Sell Candidate**
