During the last trading day the stock fluctuated **4.15%** from a day low at **kr11.56** to a day high of **kr12.04**. The price has risen in 8 of the last 10 days and is up by **12.57%** over the past 2 weeks. Volume fell on the last day by **-3 million** shares and in total, **2 million** shares were bought and sold for approximately **kr21.51** million. Given the current short-term trend, the stock is expected to rise **25.58%** during the next 3 months and, with a 90% probability hold a price between **kr13.72** and **kr15.41** at the end of this 3-month period.

Mostly positive signals in the chart today. The **Cloudberry Clean Energy AS** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **kr11.48** and **kr10.16**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Thursday, April 11, 2024**, and so far it has risen 37.46%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The stock should be watched closely.

Cloudberry Clean Energy AS finds support from accumulated volume at kr11.86 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.
