## Tech commentaries:

The **Compucom Software Limited** stock price fell by **-0.493%** on the last day (Wednesday, 3rd Jul 2024) from **28.37** to **28.23**. During the last trading day the stock fluctuated **1.70%** from a day low at **28.16** to a day high of **28.64**. The price has fallen in 7 of the last 10 days and is down by **-3.29%** for this period. Volume has increased on the last day by **40 thousand** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **99** thousand shares were bought and sold for approximately **2.80** million.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-10.55%** during the next 3 months and, with a 90% probability hold a price between **22.16** and **30.09** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Tuesday, June 04, 2024**, and so far it has risen 8.37%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Compucom Software Limited** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **28.57** and **29.80**. A break-up above any of these levels will issue buy signals. Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

**Compucom Software Limited** finds support from accumulated volume at **27.55** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **31.40**, **34.90** and **35.20**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **0.480** between high and low, or **1.70%**. For the last week, the stock has had daily average volatility of **2.99%**.

**Compucom Software Limited** holds several negative signals and is within a very wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock.

Risk: **Medium**

Evaluation: **Sell Candidate**
