MACD:	Hold

Tech commentaries:

No changes to the price of **CST Brands Inc** fund on the last trading day (Monday, 14th Aug 2017). During the last trading day the fund fluctuated **0.0206%** from a day low at **\$48.53** to a day high of **\$48.54**. The price has been going up and down for this period, and there has been a 0% change for the last 2 weeks.

The fund is moving within a narrow and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **CST Brands Inc** fund with a 90% probability to be traded between \$48.64 and \$48.91 at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and funds seldom manage to go directly from the bottom of a trend up to the top. Funds turning up in the middle of a horizontal trend are therefore considered to be potential runners.

There are few to no technical positive signals at the moment. A sell signal was issued from a pivot top point on **Monday, June 26, 2017**, and so far it has fallen -0.0206%. Further fall is indicated until a new bottom pivot has been found. Volume fell during the last trading day while price remained unchanged. This may be an early warning, but it may also not. We still recommend that you pay attention over the next couple of days.

CST Brands Inc finds support from accumulated volume at \$48.36 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the fund meets some resistance just above today's level from accumulated volume at **\$48.54**.

In general the fund tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the fund moved **\$0.0100** between high and low, or **0.0206%**. For the last week the fund has had daily average volatility of **0.0041%**.

CST Brands Inc holds several negative signals and this should be a sell candidate, but due to the general chance for a turnaround situation it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this fund since the last evaluation from a Buy to a Hold/Accumulate candidate.

Risk: Low

Evaluation: Hold/Accumulate
