Tech commentaries:

No changes to the price of **Crimson Wine Group, Ltd** stock on the last trading day (Friday, 26th Apr 2024). During the last trading day the stock fluctuated **0.94%** from a day low at **\$5.88** to a day high of **\$5.94**. The price has fallen in 5 of the last 10 days but is still up by **1.2%** over the past 2 weeks.

The stock is moving within a horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **Crimson Wine Group, Ltd** stock with a 90% probability to be traded between \$5.71 and \$6.02 at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

The **Crimson Wine Group, Ltd** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$5.90** and **\$5.82**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Wednesday, April 24, 2024**, and so far it has risen 0.84%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume gained on the last day while the price remained unchanged. This is not a classical divergence, but the stock should be watched more closely at it may be a "turning point". The very low volume increases the risk and reduces the other technical signals issued.

Crimson Wine Group, Ltd finds support from accumulated volume at \$5.82 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$5.97**, **\$5.99** and **\$6.04**.

In general the stock tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the stock moved **\$0.0550** between high and low, or **0.94%**. For the last week the stock has had daily average volatility of **1.53%**.

Crimson Wine Group, Ltd holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: Low

Evaluation: Hold/Accumulate
