Tech commentaries:

No changes to the price of **Cymbria Corporation Class A** stock on the last trading day (Friday, 24th May 2024). During the last trading day the stock fluctuated **0%** from a day low at **\$70.00** to a day high of **\$70.00**. The price has risen in 5 of the last 10 days and is up by **2.85%** over the past 2 weeks.

The stock is moving within a narrow and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **Cymbria Corporation Class A** stock with a 90% probability to be traded between \$68.67 and \$72.05 at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

The **Cymbria Corporation Class A** stock holds a sell signal from the short-term Moving Average; at the same time, however, there is a buy signal from the long-term average. Since the short-term average is above the long-term average there is a general buy signal in the stock giving a positive forecast for the stock. On further gains, the stock will meet resistance from the short-term Moving Average at approximately **\$70.24**. On a fall, the stock will find some support from the long-term average at approximately **\$68.87**. A break-up through the short-term average will send a buy signal, whereas a breakdown through the long-term average will send a sell signal. A buy signal was issued from a pivot bottom point on **Thursday, May 23, 2024**, and so far it has fallen 0%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

Cymbria Corporation Class A finds support from accumulated volume at \$68.94 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$70.10, \$70.80 and \$71.25**.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock During the last day, the stock moved **\$0** between high and low, or **0%**. For the last week the stock has had daily average volatility of **1.20%**

Several short-term signals are positive and we conclude that the current level may hold a buying opportunity, as there is a fair chance for **Cymbria Corporation Class A** stock to perform well in the short-term period.

Risk: **Low**

Evaluation: **Buy Candidate**
