Tech commentaries:

No changes to the price of **Dri Healthcare Trust** trust on the last trading day (Monday, 24th Jun 2024). During the last trading day the trust fluctuated **0%** from a day low at **\$15.13** to a day high of **\$15.13**. The price has risen in 5 of the last 10 days but is still down by **-0.79%** for this period.

The trust lies in the middle of a weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the trust is expected to rise **3.72%** during the next 3 months and, with a 90% probability hold a price between **\$15.12** and **\$16.40** at the end of this 3-month period.

The **Dri Healthcare Trust** trust holds a sell signal from the short-term Moving Average; at the same time, however, there is a buy signal from the long-term average. Since the short-term average is above the long-term average there is a general buy signal in the trust giving a positive forecast for the stock. On further gains, the trust will meet resistance from the short-term Moving Average at approximately **\$15.17**. On a fall, the trust will find some support from the long-term average at approximately **\$15.04**. A break-up through the short-term average will send a buy signal, whereas a breakdown through the long-term average will send a sell signal. A buy signal was issued from a pivot bottom point on **Friday, June 21, 2024**, and so far it has fallen **0%**. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

Dri Healthcare Trust finds support from accumulated volume at **\$15.04** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the trust meets some resistance just above today's level from accumulated volume at **\$15.17**, **\$15.23** and **\$15.51**.

In general the trust tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the trust During the last day, the trust moved **\$0** between high and low, or **0%**. For the last week the trust has had daily average volatility of **4.41%**

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **Dri Healthcare Trust** trust to perform well in the short-term.

Risk: **Low**

Evaluation: **Buy Candidate**
