MACD: Buy

## Tech commentaries:

No changes to the price of **Dinger Token USD** cryptocurrency on the last trading day (Friday, 28th Jun 2024). During the last trading day the cryptocurrency fluctuated **0%** from a day low at **\$0.000002** to a day high of **\$0.000002**. The price has been going up and down for this period, and there has been a 0% change for the last 2 weeks.

The cryptocurrency lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the cryptocurrency is expected to fall **-23.86%** during the next 3 months and, with a 90% probability hold a price between **\$0.00000094** and **\$0.00000234** at the end of this 3-month period.

There are mixed signals in the cryptocurrency today. The **Dinger Token USD** cryptocurrency holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$0.000002** and **\$0.00000212**. A break-up above any of these levels will issue buy signals. A buy signal was issued from a pivot bottom point on **Thursday, June 06, 2024**, and so far it has fallen 0%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume gained on the last day while the price remained unchanged. This is not a classical divergence, but the cryptocurrency should be watched more closely at it may be a "turning point". The very low volume increases the risk and reduces the other technical signals issued.

There is no support from accumulated volume below today's level and given the right condition the cryptocurrency may perform very badly in the next couple of days. On the upside the cryptocurrency meets some resistance from accumulated volume at **\$0.00000222**, **\$0.00000247**.

In general the cryptocurrency tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the cryptocurrency moved **\$0** between high and low, or **0%**. For the last week the cryptocurrency has had daily average volatility of **0%**.

**Dinger Token USD** holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this cryptocurrency.

Risk: **Low**

Evaluation: **Sell Candidate**
