The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-2.82%** during the next 3 months and, with a 90% probability hold a price between **£74.77** and **£95.15** at the end of this 3-month period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). A sell signal was issued from a pivot top point on **Wednesday, May 01, 2024**, and so far it has fallen **-5.51%**. Further fall is indicated until a new bottom pivot has been found. Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.
