Tech commentaries:

The **Agrello USD** cryptocurrency price fell by **-2.12%** on the last day (Friday, 28th Jun 2024) from **\$0.0006** to **\$0.0006**. During the last trading day the cryptocurrency fluctuated **3.50%** from a day low at **\$0.0006** to a day high of **\$0.0006**. The price has fallen in 5 of the last 10 days and is down by **-6.24%** for this period.

The cryptocurrency is moving within a very wide and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **Agrello USD** cryptocurrency with a 90% probability to be traded between **\$0.0006** and **\$0.0007** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and cryptocurrencies seldom manage to go directly from the bottom of a trend up to the top. Cryptocurrencies turning up in the middle of a horizontal trend are therefore considered to be potential runners.

A buy signal was issued from a pivot bottom point on **Monday, June 24, 2024**, and so far it has risen 1.18%. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Agrello USD** cryptocurrency holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$0.0006** and **\$0.0007**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell along with the price during the last trading day which is technical positive. One should, however, note that this cryptocurrency may have low liquidity in periods, which increases the general risk. The very low volume increases the risk and reduces the other technical signals issued.

Agrello USD finds support from accumulated volume at **\$0.0006** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the cryptocurrency meets some resistance from accumulated volume at **\$0.0006**, **\$0.0006** and **\$0.0007**.

This cryptocurrency has average movements during the day, but be aware of low or falling volume as this increases the risk. During the last day, the cryptocurrency moved **\$0.000021** between high and low, or **3.50%**. For the last week the cryptocurrency has had daily average volatility of **3.70%**.

Agrello USD holds several negative signals and is within a very wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this cryptocurrency.

Risk: **Medium**

Evaluation: **Sell Candidate**
