The stock lies in the middle of a wide and weak rising trend in the short term and a further rise within the trend is signaled. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

Denison Mines Corp finds support from accumulated volume at **\$1.95** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested.
