## Tech commentaries:

No changes to the price of **Duff & Phelps Utilities Income Inc** stock on the last trading day (Friday, 26th Apr 2024). During the last trading day the stock fluctuated **0.680%** from a day low at **\$8.82** to a day high of **\$8.88**. The price has risen in 6 of the last 10 days but is still down by **-0.23%** for this period.

The stock is moving within a narrow and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **Duff & Phelps Utilities Income Inc** stock with a 90% probability to be traded between **\$8.81** and **\$9.25** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

There are mixed signals in the stock today. The **Duff & Phelps Utilities Income Inc** stock holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the longterm average is above the short-term average there is a general sell signal in the stock giving a more negative forecast for the stock. On further gains, the stock will meet resistance from the long-term Moving Average at **\$8.94**. On a fall, the stock will find some support from the short-term average at **\$8.82**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day while price remained unchanged. This may be an early warning, but it may also not. We still recommend that you pay attention over the next couple of days. A buy signal was issued from a pivot bottom point on **Tuesday, April 16, 2024**, and so far it has risen 1.61%. Further rise is indicated until a new top pivot has been found.

**Duff & Phelps Utilities Income Inc** finds support from accumulated volume at **\$8.82** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$8.92**, **\$8.98** and **\$9.04**.

In general the stock tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the stock moved **\$0.0600** between high and low, or **0.680%**. For the last week the stock has had daily average volatility of **1.14%**.

**Duff & Phelps Utilities Income Inc** holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Buy to a Hold/Accumulate candidate.

Risk: **Low**

Evaluation: **Hold/Accumulate**
