Volume: Buy  
MACD: Buy

## Tech commentaries:

The **Duroc AB (publ)** stock price fell by **-2.82%** on the last day (Friday, 3rd May 2024) from **kr17.75** to **kr17.25**. During the last trading day the stock fluctuated **8.63%** from a day low at **kr16.80** to a day high of **kr18.25**. The price has fallen in 6 of the last 10 days but is still up by **0.88%** over the past 2 weeks. Volume has increased on the last day by **35 thousand** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **51 thousand** shares were bought and sold for approximately **kr872.35 thousand**.

The stock lies in the lower part of a weak rising trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **kr16.99** is broken, it will firstly indicate a slower rate of rising, but may also be an early warning for a trend shift. Given the current short-term trend, the stock is expected to rise **2.05%** during the next 3 months and, with a 90% probability hold a price between **kr17.34** and **kr18.81** at the end of this 3-month period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Duroc AB (publ)** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **kr17.63** and **kr17.49**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Monday, April 29, 2024**, and so far it has fallen **-3.63%**. Further fall is indicated until a new bottom pivot has been found. **Duroc AB (publ)** gained volume on the last day, but on falling prices. In technical terms, this is called divergence and may be an early warning. In some cases, increasing volume on falling prices may be considered positive, but that is mainly in typical "sell-offs".

**Duroc AB (publ)** finds support from accumulated volume at **kr17.20** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **kr17.45**, **kr17.50** and **kr18.00**.

In general the stock tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the stock moved **kr1.45** between high and low, or **8.63%**. For the last week the stock has had daily average volatility of **4.58%**.

The **Duroc AB (publ)** stock holds several negative signals and despite the positive trend, we believe **Duroc AB (publ)** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this stock. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Buy to a Sell candidate.

Risk: **Low**

Evaluation: **Sell Candidate**
