During the last trading day the stock fluctuated **2.71%** from a day low at **£109.04** to a day high of **£112.00**. The price has risen in 5 of the last 10 days and is up by **12.76%** over the past 2 weeks. A buy signal was issued from a pivot bottom point on **Wednesday, March 27, 2024**, and so far it has risen 32.81%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal.

Eco Animal Health Group Plc finds support from accumulated volume at **£108.50** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

Several short-term signals are positive, despite the stock being in a falling trend, we conclude that the current level may hold a buying opportunity as there is a fair chance for stock to perform well in the short-term. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Strong Buy to a Buy candidate.
