Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **Ecit As** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. Higher liquidity also reduces the general risk. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Tuesday, June 25, 2024**, and so far it has fallen 0%. Further fall is indicated until a new bottom pivot has been found.

Ecit As finds support from accumulated volume at kr7.46 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.
