Tech commentaries:

The **Empresa Distribuidora Y Comercializadora** stock price gained **1.16%** on the last trading day (Friday, 26th Apr 2024), rising from **\$16.45** to **\$16.64**. During the last trading day the stock fluctuated **3.82%** from a day low at **\$16.25** to a day high of **\$16.87**. The price has fallen in 6 of the last 10 days and is down by **-4.97%** for this period. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **38 thousand** more shares were traded than the day before. In total, **70 thousand** shares were bought and sold for approximately **\$1.17 million**.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-8.17%** during the next 3 months and, with a 90% probability hold a price between **\$12.88** and **\$17.58** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Thursday, April 18, 2024**, and so far it has risen 3.42%. Further rise is indicated until a new top pivot has been found. **Empresa Distribuidora Y Comercializadora** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. Higher liquidity also reduces the general risk. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Empresa Distribuidora Y Comercializadora** stock holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the longterm average is above the short-term average there is a general sell signal in the stock giving a more negative forecast for the stock. On further gains, the stock will meet resistance from the long-term Moving Average at **\$17.25**. On a fall, the stock will find some support from the short-term average at **\$16.55**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

On the downside, the stock finds support just below today's level from accumulated volume at **\$15.68** and **\$15.16**. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$16.85**, **\$18.40** and **\$19.30**.

This stock may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this stock is considered to be "high risk". During the last day, the stock moved **\$0.620** between high and low, or **3.82%**. For the last week, the stock has had daily average volatility of **6.25%**.

Empresa Distribuidora Y Comercializadora holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this stock.

Risk: **High**

Evaluation: **Sell Candidate**
