## Tech commentaries:

The **European Equity Fund Inc (The)** stock price gained **1.18%** on the last trading day (Tuesday, 7th May 2024), rising from **\$8.92 to \$9.03**. It has now gained 5 days in a row. It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the stock fluctuated **1.69%** from a day low at **\$8.88** to a day high of **\$9.03**. The price has risen in 8 of the last 10 days and is up by **4.34%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **3 thousand** more shares were traded than the day before. In total, **4 thousand** shares were bought and sold for approximately **\$39.87** thousand.

The stock is at the upper part of a horizontal trend and normally this may pose a good selling opportunity but a break-up through the top trend line at **\$9.14** will give a strong buy signal and a trend shift could be expected. Given the current horizontal trend, you can expect **European Equity Fund Inc (The)** stock with a 90% probability to be traded between **\$8.58** and **\$9.24** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

Mostly positive signals in the chart today. The **European Equity Fund Inc (The)** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$8.79** and **\$8.77**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Thursday, April 18, 2024**, and so far it has risen 6.69%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **European Equity Fund Inc (The)** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. The very low volume increases the risk and reduces the other technical signals issued.

**European Equity Fund Inc (The)** finds support from accumulated volume at **\$8.87** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$9.08**.

In general the stock tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the stock moved **\$0.150** between high and low, or **1.69%**. For the last week the stock has had daily average volatility of **0.759%**.

**European Equity Fund Inc (The)** holds several positive signals and is considered to be a good choice at current levels. We expect the **European Equity Fund Inc (The)** stock to perform great in the short-term period. We have upgraded our analysis conclusion for this stock since the last evaluation from a Buy to a Strong Buy candidate.

**Risk:** Low
