Tech commentaries:

No changes to the price of **Elemental Royalties Corp.** stock on the last trading day (Friday, 28th Jun 2024). During the last trading day the stock fluctuated **0%** from a day low at **\$0.786** to a day high of **\$0.786**. The price has risen in 5 of the last 10 days but is still down by **-5.87%** for this period.

The stock lies in the lower of a wide and falling trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **\$0.779** is broken, it will firstly indicate a stronger fall rate. Given the current short-term trend, the stock is expected to fall **-8.05%** during the next 3 months and, with a 90% probability hold a price between **\$0.717** and **\$0.82** at the end of this 3-month period.

There are mixed signals in the stock today. The **Elemental Royalties Corp.** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$0.795** and **\$0.84**. A break-up above any of these levels will issue buy signals. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued. A buy signal was issued from a pivot bottom point on **Wednesday, June 26, 2024**, and so far it has risen 0.512%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD).

Elemental Royalties Corp. finds support from accumulated volume at **\$0.782** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **\$0.87**, **\$0.88** and **\$0.92**.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock During the last day, the stock moved **\$0** between high and low, or **0%**. For the last week the stock has had daily average volatility of **1.36%**

Elemental Royalties Corp. holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this stock.

Risk: **Low**

Evaluation: **Sell Candidate**
