Tech commentaries:

The **Emerita Resources Corp.** stock price gained **3.70%** on the last trading day (Friday, 28th Jun 2024), rising from **\$0.540** to **\$0.560**. During the last trading day the stock fluctuated **3.64%** from a day low at **\$0.550** to a day high of **\$0.570**. The price has been going up and down for this period, and there has been a 0% change for the last 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **276 thousand** more shares were traded than the day before. In total, **333 thousand** shares were bought and sold for approximately **\$186.23 thousand**.

The stock lies in the lower part of a very wide and strong rising trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **\$0.533** is broken, it will firstly indicate a slower rate of rising, but may also be an early warning for a trend shift. Given the current short-term trend, the stock is expected to rise **39.58%** during the next 3 months and, with a 90% probability hold a price between **\$0.745** and **\$1.21** at the end of this 3-month period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **Emerita Resources Corp.** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. Higher liquidity also reduces the general risk. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Emerita Resources Corp.** stock holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the longterm average is above the short-term average there is a general sell signal in the stock giving a more negative forecast for the stock. On further gains, the stock will meet resistance from the long-term Moving Average at **\$0.619**. On a fall, the stock will find some support from the short-term average at **\$0.546**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. A sell signal was issued from a pivot top point on **Thursday, May 16, 2024**, and so far it has fallen -25.33%. Further fall is indicated until a new bottom pivot has been found.

On the downside, the stock finds support just below today's level from accumulated volume at **\$0.530** and **\$0.520**. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$0.570**, **\$0.590** and **\$0.600**.

This stock may move much during the day (volatility) and with a large prediction interval from the Bollinger Band this stock is considered to be "high risk". During the last day, the stock moved **\$0.0200** between high and low, or **3.64%**. For the last week, the stock has had daily average volatility of **5.19%**.

Emerita Resources Corp. holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this stock.

Risk: **High**

Evaluation: **Sell Candidate**
