Tech commentaries:

The **Enerjisa Enerji A.S.** stock price fell by **-0.220%** on the last day (Tuesday, 30th Apr 2024) from **TRY 68.20** to **TRY 68.05**. During the last trading day the stock fluctuated **2.62%** from a day low at **TRY 66.75** to a day high of **TRY 68.50**. The price has risen in 7 of the last 10 days and is up by **10.56%** over the past 2 weeks. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. On the last day, the trading volume fell by **-97 thousand** shares and in total, **6 million** shares were bought and sold for approximately **TRY 420.91** million.

The stock lies in the upper part of a wide and weak rising trend in the short term, and this may normally pose a very good selling opportunity for the short-term trader as reaction back towards the lower part of the trend can be expected. A break-up at the top trend line at **TRY 68.29** will firstly indicate a stronger rate of rising. Given the current short-term trend, the stock is expected to rise **8.98%** during the next 3 months and, with a 90% probability hold a price between **TRY 62.18** and **TRY 74.43** at the end of this 3-month period.

The **Enerjisa Enerji A.S.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **TRY 65.44** and **TRY 60.05**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Monday, April 29, 2024**, and so far it has fallen - **0.220%**. Further fall is indicated until a new bottom pivot has been found. Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

On the downside, the stock finds support just below today's level from accumulated volume at **TRY 59.95** and **TRY 59.00**. On the upside the stock meets some resistance just above today's level from accumulated volume at **TRY 68.20**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **TRY 1.75** between high and low, or **2.62%**. For the last week, the stock has had daily average volatility of **3.13%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **Enerjisa Enerji A.S.** stock to perform well in the short-term. We have upgraded our analysis conclusion for this stock since the last evaluation from a Hold/Accumulate to a Buy candidate.

Risk: Medium

Evaluation: Buy Candidate
